

VIRTUAL COFFEE MORNING

11 am Thursday 21 October 2021

The Great Severn Estuary Flood of 1607 – a talk by Rose Hewlett

Rose Hewlett has been researching the likely causes and the effects of the most devastating flood ever recorded on the Severn Estuary.

With the effects of global warming so often in the news, and flooding in the Somerset Levels fresh in our memories, it will be fascinating to hear what Rose has to tell us about the dramatic events of January 1607.

Non-members are most welcome to join us for the talk!

JOIN US ONLINE FROM HOME!

From the comfort of your sofa, see u3a friends old and new, and chat over coffee (make your own!) from 10.45 am. After the talk you're welcome to stay online for any questions to Rose and more chat.
